(Knoc-Turn'al)

Fear no man or no motha fuckin clan nigga,
fear no mob, fear nothing but god
And as I walk through the shadows and ride through
the valley of death,
I will fear not because I am evil.

It's like a jungle sometime it make me wonder
how I keep from going under, going under.
It's like a jungle sometime it make me wonder
how I keep from going under, going under.
It's like a jungle sometime it make me wonder
how I keep from going under, going under.
It's like a jungle sometime it make me wonder
how I keep from going under, going under.

"In the White House 'Caution' is the operative word
following the
developments in Baghdad. U.S officials say they
welcome the
event in the capital but there is no jubilation"

"A powerful snapshot, but with the celebration came a
challenge
for a White House determined to make clear down
does not mean
out and that the war is hardly over"

"There may well be fighting yet ahead, regime forces
are still in
control in Northern Iraq in Mosul, Karkuk and Tikrit"

"Yet with the caution came a small dose of 'we told you
so'"

"In the early days of the war the plan was criticized by
retired
military officers embedded in T.V. studios"
