"Keep Me In Your Mind"

I've never been out this far before.
Already I'm scared to ask for more.
I first need you to keep me in your mind.
A space, my girl, wherever you can find.

I've done my time to see this thing through.
I kept safe the words that I heard from you.
I first need you to keep me in your mind.
A space, my girl, wherever you can find.

Pools of colour held close to me.
Burning there, sending me off to sleep.
I first need you to keep me in your mind.
A space, my girl, wherever you can find.

Cos I don't mind if our day ends here.
There's no use wishing to have you near.
I don't want to let it fade away.
I just need a place in you to stay.

I first need you to keep me in your mind.
A space, my girl, wherever you can find.
I first need you to keep me in your mind.
A space, my girl, wherever you can find.
