We've been trying something a little different this tour  
we've been looking at one of our songs from a  
different angle  
under a different light  
so we can hopefully kinda almost see it for the first  
time  
we'd like to try that for you tonight, is that okay?  
we're gonna need your help though  
we're gonna need your help and your permission  
so we need you to find a comfortable space  
that is not only comfortable but vulnerable  
i want you to shut your eyes and go there  
and we'll meet you on the other side.....

Saw the gap again today  
while you were begging me to stay  
take care not to make me enter  
if i do we both may disappear

Saw the gap again today  
while you were begging me to stay  
managed to push myself away  
and you as well my dear  
and you, as well  
pushed you away my dear

I will choke until I swallow  
choke this infant right before me  
What are you but my reflection?  
who am i to judge or strike you down?  
who am i to judge or strike you down?  
but your pushing me  
and i'm shoving you  
and your pushing me  
and i'm shoving you

Rest your trigger on my finger  
bang my head upon the fault line  
You better take care not to make me enter  
if i do we both may disappear  
if i do we both may disappear

but your pushing me  
and i'm shoving you  
and your pushing me  
and i'm shoving you  
you still love me  
you still love me  
you still love me  
you still love me  
and were pushing and were shoving  
and i'm pushing as your shoving

And i'm slipping back into the gap again  
i feel alive when you touch me.  
i feel alive when you hold me.....down

slipping back into you  
slipping back into y
