I met you like in a dream,
My stupid words dont know what to say,
I am loseing myself in your eyes,
They are telling more than you.
We are near and near,
This love cant end.
Millions of promisses, millions of wishes,
I throw the world below your legs,
You are thrust me again,
I know that you are crying on your pillow,
I know that I can be happy beside you,
Happy, Ill be happy forewer beside you,
Ill be happy, I know that,
Youll be near to me,
Happy, happy and crazy for life,
Happy, well find history without the end.
