(Behold a human brain. What wonders lie within?)
Cable kings got satin swings, got radiation, save-us
thing, got fingers,
news at ten, those faces fear temptation, over
rainbows, mambo, Tower of
Babel, running lead, exploding heads, oh, the naked
and the dead, and
sometimes both, soft focus, Asterisking, you see
cables pumping sperm
for all the family, one horizontal sucking on their full
frontal lobes.
The psycho shot o'er the cuckoo's nest, electric eyes in
blue-light
haloes, burst effects, your window on the world, shot
down chain rocks,
smoke alarm, yeah dial a six pack, sink back, fold your
arms, meet Jesus,
suffer little children, peace on earth, we're watching
Scuds and blood
rain down, wiseguy rabbits breeding, bleeding, dies
for us a hundred times a
day. Exclusive here on CNN, the resurrection in slow
motion, I can feel
those holes, they got the anti-Christ got the horsemen,
saturating
(stiff?) monopolize, the whole world dies before your
eyes, take that. Zap!
