"Boom Boom"

Visit "[Boom Boom](#)" on MotoLyrics.com

Of all the modern technology when will they make what
I really need
Are they gonna fabricate the part to fix the hole in my
lonely heart?
If I laugh its cause my tears ran dry, my sense of
humor is my alibi
If you could hear whats going on inside, youd hear my
heart beat double time ?
She goes boom boom ,boom boom, boom boom ,boom
boom, boom boom,
When I look at you

So I guess Im gonna hit the streets, find someone who
can rescue me
Locked up behind my rib cage, my heart wants to come
out and play

Chs:

My heart pumps red blood, big buckets of red love
Thats exactly what she does, when its you Im thinking
of
If I were a machine my pistons would be pumping
You could hear my heart valves thumping like boom,
boom, boom
If I were a machine my pulse pace would be jumping
You could hear my system bumping like boom, boom,
boom
