Chorus:

Love is all we need,
It is the key that holds us together now.
I need to know what you want,
I need to know what you need,
Baby can't you see, this is for you and me.

Verse one:

Take a look around at what we have, yeah,
How could I help you understand,
I'm trying to figure out what love is all about.

Repeat chorus

Verse two:

I can't do this on my own,
Being together makes it easier than for us to be alone,
I need you babe, to show signs that you really care.

Bridge:

And if you have any doubts,
I'll help you work them out.
There's no need to fear, I'm here,
'cos that's what love's all about.

Repeat chorus to fade

Break:

Just a little love, love is all we need,
Take a look around, baby can't you stay with me?
I need to know, oh baby can't you see?

I want to know what you want,
I really want to know what you need,
Baby, baby, baby.

Repeat break
