I didn't love you anyway
you can go, you just don't have to stay
'cause I just found a day where I can say that I'm free

All the empty words you said
keep presentating in my head
and it's easy now to see
that you were never meant for me

So make your point and let's not talk about it any more
It's getting late and I'm feeling like I'm hurting all..before..

And Ill...I'm not afraid to fly ...no no
'cause I've been holding now so looong
I feel like letting go,
and if I fall I hope that I will,
fly back down to Earth
somewhere save from harm! [2x]
