I am The Dark Star
Fallen from the sky,
Calling the unknow
Will control your brain,
will control your moves.
Lettin' blood go out,
the nothing surrounds fears.
The creature of dark is
coming out.
Suicide.
All you need down,
this experiment of fear
When pills and cerebric writhe

Try to shake you up.
U stay for a while
waiting the end of this all
u must die
there's no care
u must die
there's no more way
Tell me something about salvation
while i lead you in my cage
Tell me if can take the safe way
While i keep you in my game.
Leave me going there.
I'll stay near, Waiting.
