"If You Belong To Me"

I left you crying on that angry morning
You know I lied
I'll always run from anything that loves me
To my safe side

My world circles 'round a different sun
That's all burned away
I know that you're the only one
Now I'm walking down some distant street
And I know your touch is out of reach

Girl you belong to me I know
And it was wrong for me to ever let you go
Girl you belong to me I know

Everybody has a lonely moment
They can't explain
And everybody wants to feed their hunger

Without the pain

There's no shadows in my hiding place
I'm so locked away
Now I wish that I could see your face
I know I hurt you when you say we're through
I never really will get over you 'cause

Girl you belong to me I know
And it was wrong for me to ever let you go
Girl you belong to me I know

[Instrumental brake]

Girl you belong to me I know
And it was wrong for me to ever let you go
[Repeat with fade]
