"At War With Nature"

Visit "[At War With Nature](#)" on MotoLyrics.com

The planet is an organism
Humans are the cancer
We've almost drained our host
So nature has no answer
A rapid spreading virus, one that kills within days
Destined to wipe out the human race
As we enroach on nature and cut down all those trees
We are the ones to blame for what we have released
A rapid spreading virus, one that kills within days
Destined to wipe out the human race
War, War, War, War with nature
To kill and destroy is human nature
Dont be surprised if the animals hate you
The whole human race is at war with nature
And when it all starts sinking
You'll know who's to blame
The virus that nature is spreading is just her form of
self defence!
