But we need to create more
Oh of course, don't forget to upset the best
please slay more!
Kill everything, that's what we need
How can we repay you
You've been so kind
Don't worry about all the shit you've done
it's only irreversible!

Produce, industry
Blackened water poisoned sea
more for you, more for me
It's only irreversible!
Another fucking oil spill
Another fucking forest killed
How much fucking more until
It's only irreversible
All you get - youre blind
stupid fuck - youre blind
nothing left - youre blind
It's only irreversible - Gone!
