With the healing of a heart  
The hillsides grow green  
The soils rich and dark  
There's a clear running stream  
And the past fades away  
With the melting of snow  
Spirits lift up  
And wild flowers grow

With the healing of a heart  
Stars align in heaven  
Love lights the dark  
With the healing of just one heart  
Just one heart

Ohhhhhhhh  
And with the healing of a heart  
The whole world springs anew  
Fresh as forgiveness  
Sweet as the words I love ya  
I love ya

It's just a word to sing  
I've been waiting, I've been waiting  
For a brand new day

With the healing of a heart  
Stars align in heaven  
Love lights the dark  
With the healing of just one heart  
Love lights the dark  
With the healing of just one heart  
Love lights the dark  
With the healing of just one heart

With the healing of a heart
