

Lads, The "Creator"

Visit "[Creator](#)" on MotoLyrics.com

Do you ever wonder
Wonder what is beyond this big blue ball
Is there something under
Something underneath the surface of it all

There's one million billion planets spinning out in space
Galaxies and galaxies he put them all in place
He set them all in motion all the powers that can be
It's such a funny notion to think he cares for me
Well it's plain to see...

My best friend's the creator of the universe
Although he's bigger than the milky way
He wants to know about my life today

Do you ever wonder
What if God was somewhere up there in the sky
What if he was much closer
Close as your toaster closer than your tie

What if God came down
Came to your home town
What if God was walking around
What if it's all true
What if God loves you
What if he was your best friend too?
