(Kim Carnes/Greg Barnhill)

I thought you were just a friend  
Someone I could talk to when I needed a shoulder  
Seemed like just another night  
Somehow you just happened by  
But you knew better  
I found out when we kissed

And oh, just one little kiss  
And now I know what I missed  
Baby all my life and I was not expecting this  
Now you got me where I live  
With just one little kiss

They say things we leave unsaid  
They just turn into regrets  
When nights get long and lonely  
Somehow baby you got through  
I've been waiting for you too  
I didn't know, I found out when we kissed

And oh, just one little kiss  
And now I know what I missed  
Baby all my life and I was not expecting this  
Now you got me where I live  
With just one little kiss

You think that love forsakes you  
Then by surprise it takes ahold

And oh, just one little kiss  
And now I know what I missed  
Baby all my life and I was not expecting this  
Now you got me where I live  
With just one little kiss
