It's written in the stars
(Yeah, yeah, yeah)

It's in the stars
I know that it's true
Baby, you know it's me and you
It's in the stars
You've got to believe
You are the only one I need
It's in the stars

It's written in the stars

I had a mission
I wanted to search the world and you
Became my addiction
Cause you had me right from the start
It's hard to believe that we're inside a dream come true

It's in the stars
I know that it's true
Baby, you know it's me and you
It's in the stars
You've got to believe
You are the only one I need
It's in the stars

It's written in the stars

Look into the future
See, that it was made for you and me
Baby, when we're together
We can reach for the sky

It's hard to believe that we're inside a dream come true

It's in the stars
I know that it's true
Baby, you know it's me and you
It's in the stars

You've got to believe
You are the only one I need
It's in the stars

It's written in the stars

It's hard to believe that we're inside a dream come true

It's in the,
It's in the stars
I know that it's true
Baby, you know it's me and you
It's in the stars
You've got to believe
You are the only one I need

It's in the stars
I know that it's true
Baby, you know it's me and you
It's in the stars
You've got to believe
You are the only one I need
It's in the stars
