I want you  
I can't get you off my mind  
Ooh you turn me on-stay

So sorry you think it's wrong being here alone with me  
I wish I could understand you and what you feel  
You must feel something or you wouldn't have let me  
get this far  
So don't be afraid just give in

If you let me have you just this once I promise never to  
want you anymore  
'Cuz what's happening now feels so good  
And the forbidden always arouses temptations  
Come here let me have you  
Just stay  
Ooh baby come on let me
