There been many times when I couldn't see  
What you had in store for me and  
There been many time when I didn't know  
Which way or where to go  
Times I walked around head hanging down  
Full of insecurity  
Wanting to find out what this life's about  
But you told me to wait and see cause

You hold the stars in place  
Order time and space  
And yet you know my name  
You hold me in your hand help me understand  
Your love will never change  
Cause you know my name

I've wondered why every time I try

I just seem to loose my way  
Nothing's making sense and at my own expense  
It's a heavy price to pay  
But your always there taking all my cares  
So ready to be my friend  
Every where I go I know  
There's no place you haven't been

Chorus

As I walk this road I'm not alone your always beside me  
My life you own my fear is gone  
Cause now I believe

You know my name  
Your love never changes  
It's always the same (repeat)

Chorus 2X
