You know I'm watching, may I suggest some more

You know how to play this game 'cause you caught my  
eye

About the same time I caught yours

Now you can take it how you want to baby

It doesn't really matter what you say

I can take you home, I can make you mine

Make it up play it up I think it's better that way

Lies, tell me lies

I don't want to know the truth about you

Tell me lies

Now your telling me a story about the when and where  
and how

You know how to look so good and move so fine

And make me feel how I feel now

It only matters that you want me baby

It doesn't matter where the conversation goes

It isn't what we think it's just what we do

And if you want this too, well that's as deep as it goes

Chorus
