None of this sounds right to me  
So, let them come and get me for this  
For fucking saying it  
They know where we all live as it is  
So fuck it  
Come and get me  
Try and fucking find me  
We're no secret  
I'd rather be a blade in the face of a hunter than  
another sinking ship  
At the bottom of a hidden harbor of welfare water and  
pension plans  
Come and get me  
Of platinumized lives and celebrity scams  
I'm no secret, I'm just your fucking night  
We're not safe
