

## Trash Can Sinatras

### "Co-stars"

Visit "[Co-stars](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Blue soft light on ailsa craig  
The feeling, free wheeling up electric brae  
And letting all I had roll away  
Was dare I say  
Defiance of science, in its own way

And now I'm in the smirr and haar  
You're with me like a watermark

Co-star, who dimmed my life so dark  
Do we have to fall so far  
All I had I gave to you  
You took my love in lieu

Another sweetheart coming through  
Do I feel stupid? you bet I do  
Well I'm not used to being used  
Everybody says I'm this kind of guy  
Washed ashore  
No thumb so sore  
On the cutting room floor  
I hate this time of life

Among the also-rans in the heavens  
The nearly-men on mars

Co-stars, we fall in love so far  
Do we have to fall so dark  
All I had I gave to you  
You took my love in lieu

The nights on song  
The days the light was strong  
Are gone  
The nights on song  
(The nights on song)  
The days the light was strong...
