Chorus:

You can't push us around, you can't push us around
You can't push us around, you can't push us around
You can't push us around, you can't push us around
If you try, you gonna drop six feet underground
You can't push us around, you can't push us around
You can't push us around, you can't push us around
You can't push us around, you can't push us around
If you try, you gonna drop six feet underground
He pop us in the closetâ€¦ that book shot
Little sister hide behind the grand father clock
I seem them all, good money get washed
I wash the shot, gun shell gonna pop
Got a couple rounds and they ship me astray
I don't know why I will stay this way
Security will only break me
If you only get in, the bug you say
Too much millions in my cup
Too many people are in thisâ€¦
You keep looking at me like you want toâ€¦

Chorus:

You can't push us around, you can't push us around
You can't push us around, you can't push us around
You can't push us around, you can't push us around
If you try, you gonna drop six feet underground
You can't push us around, you can't push us around
You can't push us around, you can't push us around
You can't push us around, you can't push us around
If you try, you gonna drop six feet underground
Little brother waste on the front yard gym
Always.. gym to quit
Stands five two, meet.. slim
Mother fucker thinks he sits with him
Never seen the young man act so broke
Never seen the frat, take youâ€¦ see that crown
Put another big bag in his coat
But you know it's a fucking bunny when he comes to town
I know a little somethingâ€¦ getting high
I know a little somethingâ€¦ getting drunk
You fuck with the wolf pack and everybody rise

So don't jump in the clear!

Chorus:

You can't push us around, you can't push us around

You can't push us around, you can't push us around

You can't push us around, you can't push us around

If you try, you gonna drop six feet underground

You can't push us around, you can't push us around

You can't push us around, you can't push us around

You can't push us around, you can't push us around

If you try, you gonna drop six feet underground

I don't know what's wrong with me lately,

but I really feel like myself

Everybody's reaching for money, sorry that I can't hep..

I wouldn't tell you were wrong, I'd tell you were..

Put both of my feet, both of my knee on the ground

I'm dropping shady shit

..close to me more than a god damn

Too famous, quick!

..you better jump in the clear!

I stand up at the bar like a fucking animal

Keep if I gotta eat, I'mma eat you alive

You fucking cannibal!

I say eat if I gotta eat you alive

I know I said that twice and don't make me say it again

mother fucker

Chorus:

You can't push us around, you can't push us around

You can't push us around, you can't push us around

You can't push us around, you can't push us around

If you try, you gonna drop six feet underground

You can't push us around, you can't push us around

You can't push us around, you can't push us around

You can't push us around, you can't push us around

If you try, you gonna drop six feet underground
