Color A Life

Goodbye lost time
How it seems to get away
If I knew why
My world might take a simple shape
I long to see the side of this
When patience tells me to forgive
Cause we've all been wronged and wronged ourselves
Picture perfect, what a scheme
I am what you see

Color a life it's all pretend
I couldn't be what I was then
Further away from what has been
Color a life and back again

Shameless, hard pressed
To make the coming days worthwhile
Intrigue so deep
It hardly seems to make much sense
Nothing gives and no one gets
The very things that they expect
Over and over
Tell myself it's make believe
I know what I need

Color a life it's all pretend
I couldn't be what I was then
Further away from what has been
Color a life and back again
