Hold Me High

Mother may I take one step forward I want to fly
Somehow get past all the things that I feel I have lost
inside
Promise by springtime I'll be able to rise above
Maybe til then I can just pretend I don't notice too much

I don't wanna be here alone
Harbor these thoughts on my own

So lead me on, hold me high
I need to know there's a way
So lead me on, hold me high
I need to feel what it takes
Send me on my way

Riding on wings, can you still see the stars in my eyes?
I've gotten colder, the worlds feeling older
Don't let me hide
Serenade me even though I won't see you in my life
A heart full of holes is the very last thing that you gave
to me
I don't wanna be here alone
Harbor these thoughts on my own

So lead me on, hold me high
I need to know there's a way
So lead me on, hold me high
I need to feel what it takes
Send me on my way

So lead me on, hold me high
I need to know there's a way
So lead me on, hold me high
I need to feel what it takes
Send me on my way
