Give me a gun by Lavvi Ebbel
this is 1981 and the world is getting worse everyday
nothing has changed, the rich are getting richer
anyway
we got to open our eyes, we got to see wat's going on
we got to make our choice, we got to say who's site we
really are

send to look at those cold wars were people fight to be
free
bloody repression can't keep revolution away
but we don't care about what's going on on there
we don't wanna know, and we saved us 'nothing we can
do'
