"Crash Into Me"

When it started it was a simple dance
According to the beating we moved hand in hand
I don't know how, but it happened fast
When you came inside, Everything gone mad

I know your kind but I won't resist
You have the beauty what I wanna feel
I know you wanna play, but how does it feel?
When you are the victim, and I'm ready to kill

I'm on fire, I won't think twice
I want you to crash into me now!

Come on!

Lock the door behind us, I want you alone
Just turn off the lights, press your lips on mine
Come on!
Scorch me with the fire that burns in you
You're takin' me high, I can't stop

I won't let you down, I promise you
Let the fever suffocate you
I won't let you down,

I won't let you down, I promise you
Let me burn you inside of you,
I won't let you down,

Don't stop,
