"Big Bridge Over A Small River"

All the trees in the world
Have one purpose in mind
To try and reach the sun
And touch him from behind

Thunder rolls in the sky
And the stupid ask why
They think you're rolling around
Scaring them with sound

And I don't breath for my own sake
The choice is just not mine to make

I, therefore You (4x)

All the kids that lived in my street
Still live there today
Now they're as old as me
But younger somehow

I don't pretend to swing
I showed off all that noise
Dress me up in the truth
We're all your girls and boys

Why do I sleep the night away?
There's only so much time to prayâ€¦!
