

## Anthony Smith "Who Invented The Wheel"

Visit "[Who Invented The Wheel](#)" on [MotoLyrics.com](#)

I wanna know who invented the wheel  
Tell me who discovered steel  
It was the wheel and the steel that caused his pain  
That made the car that took her away  
I wanna know who invented the wheel

I wanna know who found the rock  
Tell me who made the blacktop  
It was the rock and the blacktop that caused his pain  
That made the road that took her away  
I wanna know who invented the wheel

Somebody give me a name  
I just need someone to blame  
For all of this heartache and pain I've been feelin since  
she let me go

I wanna know who invented the time  
Out in the spook when she was mine  
It was all that time I didn't take  
It was the rock and the blacktop that made the highway  
For the wheel and the steel and the car  
And it took her away

Somebody give me a name  
I just need someone to blame  
For all of this heartache and pain I've been feelin since  
she let me go

I wanna know  
I wanna know

I wanna know who invented the wheel
