

Less, The "Let It Go"

Visit "[Let It Go](#)" on MotoLyrics.com

She said "I think I'm gonna be alright, be alright
I don't know why but I am gonna try and wait it
through."
I said to her that "You don't look that great"
What's your take?
What's it gonna take for you to see the way and find
your place?
Don't fall away from grace

Let it go. Let it fly
Let it free to work inside
You know the truth will
If you let it take you high

Let it go. Let it fly
Let it free to work inside
Nothing can take you or break you
Let it go

Everybody feels alone sometimes, hurt sometimes
True its not a secret, but I know that we are gonna
make it through
There is a freedom that I can't explain, can't contain
All the pain you carry will be wiped away
And you will see a new and brighter day

Let it go. Let it fly
Let it free to work inside
You know the truth will
If you let it take you high

Let it go. Let it fly
Let it free to work inside
Nothing can take you or break you
Let it go

Just close your eyes and make it right, it's calming over
you
Don't let the sun rise up before this thing is made
brand new (2x)

Let it go. Let it fly
Let it free to work inside
You know the truth will
If you let it take you high

Let it go. Let it fly
Let it free to work inside
Nothing can take you or break you
Let it go

Let it go. Let it fly
Let it free up inside
You know the truth will
If you let it take you high

Let it free you up inside
You got to, you got to
You got to let it go
