When I opened that letter I realized  
This was nothing I wanted to see  
Now I'm stuck with my pen and some paper  
And a headache with nothing to say

That day I left you came and said to me  
"You were the only thing I wanted to believe"  
Now that I'm gone I wish that I could leave  
I guess these things just aren't really the way they  
seem

What goes around comes around  
I never thought I'd be this way  
You picked me up when I was down  
I think I'll be okay

And I remember the day that I met you  
Yeah, I remember those things that you said  
You told me that you would love me forever  
And it's girls like you that make me wish I never left  
there

I've been on the road so constantly  
I guess I made forgetting me way too easy  
But that's alright I hope you're feeling free  
You got what you deserve, now you can finally breathe  
When I come around there, don't even tell me that  
you're sorry

What goes around comes around  
I never thought I'd be this way  
You picked me up when I was down  
I think I'll be okay

And I remember the day that I met you  
Yeah, I remember those things that you said  
You told me that you would love me forever  
And it's girls like you that make me wish I never left  
there

And it's girls like you that make me wish I never left

there  
(Wish I never left there)  
This is not how I wanted it to end, no  
But this is how it's gonna be

What goes around comes around  
I never thought I'd be this way  
You picked me up when I was down  
I think I'll be okay

And I remember the day that I met you  
Yeah, I remember those things that you said  
You told me that you would love me forever  
And it's girls like you that make me wish I never left  
there

Yeah, it's girls like you that make me wish I never left  
there  
Yeah, it's girls like you that make me wish I never left  
there
