Now when I was a young girl  
My dad warned me about...  
The opposite sex  
He'd say "Yeah, that's just what you need...  
Some crazy boy with wild ideas...  
You know what always happens next."

I tried to heed his advice  
But now I'm thinkin' it sounds kinda nice

That's just what I need on a night like this  
A long walk in the dark, someone I can't resist  
A little rendezvous, a little mystery  
Now when I look at you I think that's just what I need

Now my mama told me in this dog eat dog world  
"Baby, you gotta work harder than a man..."  
And she'd say "Yeah, that's just what you need...  
Some romance book romeo callin' you at work  
And messin' up your plans."

But, night falls, I slow down  
I start dreamin 'bout you comin' around

That's just what I need on a night like this  
A long walk in the dark, someone I can't resist  
A little rendezvous, a little mystery  
And when I look at you I think that's just what I need

Moonlight, sweet bliss  
And melting with every kiss  
Dancin', real slow  
When you hold me close I know...

That's just what I need on a night like this  
A long walk in the dark, someone I can't resist  
A little rendezvous, a little mystery  
Now when I look at you I think that's just what I need
