I called up my DJ on Friday after work  
I told him how you done me wrong, how much it hurt  
I said, "Mister I got some things to get off my chest"  
I told him what I had in mind but he turned down my  
request, he said

"You can't say that on the radio  
I'd really like to help you out that's just the way it goes  
It's so sad and that's too bad, everybody knows  
You can't say that on the radio"

He told me he understood exactly how I felt  
He said, "Boy, I've been in your shoes once or twice  
myself  
I've got a hundred thousand watts a runnin' through  
this microphone  
And I could let your message ring loud and clear  
But tomorrow I'd be gone, because

You can't say that on the radio  
I'd really like to help you out, that's just the way it goes  
It's so sad and that's too bad, everybody knows  
You can't say that on the radio", yeah

You can't say that on the radio  
I'd really like to help you out, that's just the way it goes  
It's so sad and that's too bad, everybody knows  
You can't say that on the radio, no, you can't say that  
Oh no, you can't say that, you can't say that  
you can't say that on the radio
