We fell in love at first sight
I can't explain the feelings
When I first saw you

We were so so happy
A lifetime of love
Sweet honey child
You'll always be mine

But then I played the fool
I never meant to hurt you
Or sleep with all your friends

We reconciled
We found ourselves
Our love was meant to be
Oh, baby can't you see

You left me standing
In the mud
Crying to myself
A heart so full of pain

But we fell in love again
This time forever
True love prevails over all
She got hit by a truck
