The day this becomes a hit is the same day that people will realize there are no such things as "swear words" (why is "shit" bad and "excrement OK), that sex is not pornography, violence is, and that heavy metal is not the devil's music (I personally think he's into new age). This is a free country. Speak your minds people. Think it, say it, and fuckin' live it. The main voice on this track is by Scott. All the other voices are by Charlie, Frank, Joe, Dan, and Mark Dodson.
