X2

Ooh wow, look at the bitches up in this club
Man im gettin me some digits fo i leave up out this mug
And it's like oh pal, wam, bam, thank you ma'am
I ain't kissin you on the lips, but ill be glad to shake your
hand

Now lets get blew out, lets start some shit tonight
Just let me pick the chick that I'ma leave here with
tonight

Before we get the fighting, and Throughout
This music makes me rally, how they gonna play that
new trick trick

And expect no-one to get their shit spit
It's just too wild, and one more shot of hypnotic
And I am not in control of my body, I go robotic and
blow a fuse out

Homies is like you're startin to static
And I'm nah that's just my swagger but I'm dancing
with this fat girl
And gettin Loose now, I don't wanna fight, I feel like
partying

Till' this idiot dumps his bacardi on my cardigan and
knocks my screws out

It never fails, I'm know I'm going to jail
I might as well take the laces out my shoes now
got big killas with big guns (who want it)
come to my hood, get some (who want it)
wanna start shit in the club boy (who want it)
touched up (who want it)
fucked up (who want it)
