trust
in this thing now
because we're just getting started
please don't back out on me now

i will come up
with such a genius plan
all you'll have to do
is say yes

Scream it outloud
or whisper it softly
and i'll take care of everything else
So tell all your friends
you don't need their advice
there's just one word to learn and recite

in my arms now
where all of your problems
will become my problems as well
i will take them
and blow them away
just as quickly as you can say yes
