"All night long"

Visit "[All night long](#)" on MotoLyrics.com

Never felt the softness of her tender kiss
I never felt her heart beat strong
All I know is she's in every dream I dream
All night long

Never heard her speak a single word of love
I never knew her favourite song
'Cause she only speaks to me in dreams I dream
All night long

When I sleep she tells me she's in love with me
and how she needs me to be near
But at best the dream is just a fantasy
And if I touch her hand she'll disappear

I don't need love that's just a memory
Tell me faith, how could I be so wrong
Got to find a woman who is home to me
All night long
