[1st verse]

(LiL NiCc)

ever since i saw you
that very first day
i wanted to get to know you
and make you my bay bay
talked to you just a bit
that connection was made
remember how you looked
when i asked for your aim
then i got your number
it must of been fate
think that we just friends
though i'm always in your away
know that you feeling me
but i don't think we ready
so maybe we should start slow
and just take it easy
got me so lost
you always in my thoughts
i always think of you
when i make a love song
got hell of feelings for you
and it aint seem wrong
put you next to me
cause thats where you belong
see you wit ma partner
and i get a little jealous
we aint even going out
but i know where my heart is
wanna spend time with you
and thats regardless
of what we decide to do
cause i want you as ma boo
nothing above you
its all about timing
and wen i decide to ask you
thats whats gonna be true
also about trust

don't need to set no rules
just need to love me
and i'll love u too

[chorus]

(Swt Baby B)

Baby I want (to make you mine)
But Let's just take
(take our time)
I'll be by your side someday
let's just wait
till i'm yours

[2nd Verse]

(Swt Baby B)

You Got Me Thinking of you
24 7 of the day
the first time that
we laid eyes i felt
this special feeling inside
You take my breath away
I.. daydream about you everyday
we're only friends for now
but your so much more
my homie, my best friend
the one i adore

[chorus]

(Swt Baby B)

Baby I want (to make you mine)
But Let's just take
(take our time)
I'll be by your side someday
let's just wait
till i'm yours

[3rd verse]

(LiL NiCc)

girl i wanna be yours
and i know u wanna be mine
every time i talk to u
hell of things go through ma mind
should i quit the small talk

and just get to how i feel
u all i ever wanted
and thats for real
wanna know whats up
i gotta crush on you
know that u like me too
girl wanna be ma boo
holding yo hand
we more then just friends
now lets not pretend

(Swt Baby B)

and i wanna be more than friends
i knew from the start
i didn't want this to end
no more
i got a crush you too
i got a crush on you
