It's to be almost time to wake up  
Turn to the right receive a kiss  
Having breakfast courts and still shied  
Oh could it get any better than this  
When I sleep you make it happen  
When I am awake you say you do  
Wish that I could lay here forever  
To hear you say there is only you  
Wake by the sun of the alarm  
No way the lonely start of another day  
I am climbing off my leather  
And what I find is the empty frame  
You left behind When I sleep you make it happen  
When I am awake you say you do  
Wish that I could lay here forever  
To hear you say I need you  
You hear me say I need you too  
Uuuu it's perfect for a while  
Uuu it's perfect for a while  
When you kissed me goodnight  
it's perfect for a while  
to create the perfect life  
it's perfect for a while  
When I sleep you make it happen  
When I am awake you say you do  
Wish that I could lay here forever  
To hear you say I love you  
You hear me say I love you to
