Something's gonna happen I can feel it in the air  
My master's going for a walk and I'm gonna be there  
It's too late for the beach so we'll definitely walk the  
park  
I'm really looking forward so I jump around and bark

One block before the park I raise my ears I hear some  
noise  
We're not going for a walk he's gonna meet the boys  
They're gonna do their drinks and drugs and that's  
nothing for me  
Another wasted night and I can't sniff around the trees

I've got to face a heavy night  
Find my way in the crowd  
No way I can lie down and rest  
The music's way too loud  
There's broken bottles everywhere they cut and make  
me bleed  
I wish they'd have dog aspirin cause that's just what I  
need

My master's had a good time he's got a funny talk  
We try to find the way out but he can hardly walk  
I guide him through the city now that's alright for me  
But when we're home he falls asleep and I still got to  
pee

Oh no not the punks again  
Always with their amps on 10  
Don't they know I hear 7 times more  
I wish they had left me at home
