When we were together I knew that forever
I'd always, my days
follow you into the blue beyond.

Dream with one another
help each other over the rainbow
You know I'd follow you into the blue beyond

I never wanna be anywhere I can not see
The love light you shine
Only wanna be wherever you are, running with my
friend.

You never will be lonely
You need only look right behind you

To find who will follow you into the blue beyond.

Never wanna be anywhere I cannot see
The love light you shine
Only wanna be wherever you are, walking hand in
hand.

Dream with one another
help each other over the rainbow
You know I'd follow you into
I'd follow you into
I'd follow you into the blue beyond.
