Look out for the land rush
It's coming day by day.
Said, get ready for the land rush
It's headed right your way.

Look what you're paying
To live on your land
And most folks don't even have some
But I don't understand.

Chorus:
Spread the news across the land
And just do the best you can
All we've got is just the land
Take a stand, save the land.

Sometimes I sit here thinking
But all the answers just don't appear.
I'm calling to my brothers and sisters
Let's get together and kill this fear.

There ain't really gonna' be much to it
We can control the thing if we try
With just a little more understanding
The whole world will get by.

Chorus:
Spread the news across the land
And just do the best you can
All we've got is just the land
Take a stand, save the land.

Chorus:
Spread the news across the land
And just do the best you can
All we've got is just the land
Take a stand, save the land...
