Vampire
There's something we gotta tell you
We not like other girls
Ha ha ha
(Shake the thighs)
And away we go

Midnight, dim the light
Gonna be full moon tonight (hey)
Gonna cause a lot of rage alright
I can see a lot of break in sight
Knock knock check the locks
Better stay inside 'cos we can't be stopped (can't be
stopped)
Tick tock better watch the clock
Hearts racing 'cos we feeling hot

We creatures of night
So don't be fooled by our shape or size
We coming after you so hide
And if you have any other plans
You better forget about them

My body, needs more and more
Can't sleep, 'til I get it all
The streets, ain't sipping no more
Don't speak, can't hear you call
So scream, but dangerous
You'll see, if you curious
Better believe the secrets of the night

(Better believe, you better believe)

On track, creeping up
Think you're ready, better I bet your not (bet your
not)
Gonna give you an electric shock
Gonna hit you like a million watts
I gonna hit full blow that's a fact
I'm gonna get you with a full contact
Like bad infended it's a natural fact

The mystery of Mis-Teeq
Beware we are that

The mystery is our disguise
So deep into our lives and you'll find a big surprise
There's no way now before sunrise
So if you have any other plans
Forget about them

My body, needs more and more
Can't sleep, 'til I get it all
The streets, ain't sipping no more
Don't speak, can't hear you call
So scream, but dangerous
You'll see, if you're curious
Better believe the secrets of the night

(Better believe, you better believe)

Now I'll be the movement in the night
You'll never really thought that real beings come alive
But I'll proof that we can rock it from the dark side
And when I'm hungry it's time for me to take a bite
But don't you know to try not to believe
I'm coming around corner don't stop and breathe
'Cos if I ever smell the blood running through your
veins
You'll never ever ever live to see another day

I'm gonna hit you full blow that's a fact
I'm gonna get you with a full contact
Like bad infended it's a natural fact
The mystery of Mis-Teeq
Beware we are that

My body, needs more and more
Can't sleep, 'til I get it all
The streets, ain't sipping no more
Don't speak, can't hear you call
So scream, but dangerous
You'll see, if you're curious
Better believe the secrets of the night

(Better believe, you better believe)
(Better believe, you better believe)
