We came a long way  
From the first day  
We set foot...

Underground - indoors  
In the damp - in the cold  
To find our new home...

So I finally found myself  
Finally found a place to call home  
Underground - indoors  
Very damp - very cold  
Warm in heart...

(And) we find a way to break these chains  
Find a way to erase the day  
Find some way  
Fill our void...

So I will scream this out  
To all who listen  
As people - as human  
Underground - with open doors  
Feel our warmth
