The Berlin Wall falls in the East
The West claims triumph, "We've really got 'em beat!"
Politicians from the West claim the police state's dead
But what about the police state in the West?

Police state in the USA
It's fascism with a friendly face
Police state in the USA

The government controls everything you do
With the police and the feds watching over you
You try to stand against them and you'll end up dead
As your front door is smashed in by the ATF

Police state in the USA
It's fascism with a friendly face
Police state in the USA

Your television screen shows the feds most wanted
But do you truly know why these men are being
hunted?
It's a big brother state it's the same as the East
The cops protect the rich and the corporate elite

Police state in the USA
It's fascism with a friendly face
Police state in the USA
