It's gonna take some action and some reaction from....
... from me and you
... obtain the truth
Time after time there are so many secret...
'Cause you gotta stand up and you gott make demands
to...
... decisions made
Where we have no choice and no representation...

... and have no say
It's in front of your face, (it's in front of your eyes)
But you must open your eyes, if you're to see the truth

They try to tell us as a free democracy we....
... file we can't see
"NATIONAL SECURITY" concerns a whole country but..
... run this country
... the government plays
But nobody wants to talk about the CIA files....
Our "security" blamed for our restricted freedom a
game...
... we have no say
It's in front of your face
if youre to see the truth
(it's in front of your eyes)
But you must open your eyes

Then the ideal they pass as freedom in this country is a
fake
When there are secrets that we don't know
When we are left with no right or no voice to choose
Then we're not living in a free & democratic state

(it's in front of your eyes)
But you must open your eyes
It's in front of your face
if youre to see the truth
