"What You Don't Know"

Visit "[What You Don't Know](#)" on MotoLyrics.com

It's gonna take some action and some reaction from
From me and you
'Cause you gotta stand up and you gotta make
demands to
Obtain the truth

Time after time there are so many secret
Decisions made
Where we have no choice and no representation
And have to say

It's in front of your face, it's in front of your eyes
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

It's in front of your face
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

They try to tell us it's a free democracy which
Runs this country
But nobody wants to talk about the CIA files
Files we can't see

National Security concerns a whole country but
We have no say
Our security blamed for our restricted freedom a game
The government plays

It's in front of your face, it's in front of your eyes
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

It's in front of your face
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

When there are secrets that we don't know

Then the ideal they pass as freedom in this country is a
fake
But we are left with no right or no voice to choose
Then we're not living in a free and democratic state

It's in front of your face, it's in front of your eyes
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

It's in front of your face
But you must open your eyes, if you're to see the truth
It's in front of your face
But you must open your eyes, if you're to see the truth

It's what you don't know, no, no, no, no
It's what you don't know, no, no, no, no
It's what you don't know, no, no, no, no
It's what you don't know
