I am happy that I have you  
Even though you're not here now  
I know somewhere you are dreaming  
Though it's definitely not of me

It doesn't matter if this all shatters  
Nothing lasts forever  
But I'm praying  
That we're staying together

I am warmed by your friendship  
Even when you're far away  
And I'm happy in the knowledge  
We may never see the day

When I kiss you & you kiss me  
Don't pretend you miss me  
The worst kind of diseased mind  
Is one filled with jealousy

If we should meet again  
Don't try to solve the puzzle  
Just lay down next to me  
And please don't move a muscle

I will thank you, most of all, for  
The respect you have for me  
I'm embarrassed; it overwhelms me  
Because I don't deserve any

It doesn't matter if this all shatters  
Nothing lasts for ever  
But I'm praying  
That we're staying together
