The landscape is changing
The landscape is crying
Thousand of acres of forest are dying
Carbon copies from the hills about forests lie
Acid streams are flowing ill across the countryside

'Cause I don't care if you're going nowhere
Just take good care of the world
I don't care if you're going nowhere
Just take good care of the world

Now we're rearranging
There's no use denying
Mountains and valleys
Can't you hear them sighing?
Evolution
The solution, almost certainty
Can you imagine this intrusion of their privacy?

'Cause I don't care if you're going nowhere
Just take good care of the world
I don't care if you're going nowhere
Just take good care of the world

Talking gestures
Some semblance of intelligence
Can we be grateful?
The security of ignorance

'Cause I don't care if you're going nowhere
Just take good care of the world
I don't care if you're going nowhere
Just take good care of the world
