"All The Answers"

Visit "[All The Answers](#)" on MotoLyrics.com

You know
You know all the answers
To my questions
I have asked
I have touched you
All around me
You frustrate me
Just delete me

Some people are afraid of you
But I'm not, I'm not
I'm a dummy and I just don't care
Only you know (thru my window)
All the answers (answers)
All the answers (answers)

I'll explore you
I'll unfold you
I'll download you
Then I'll store you
When you're perfected
Then you'll kill us
With your virus
You're a tyrant

Some people are afraid of you
But I'm not, I'm not
I'm a dummy and I just don't care
Only you know (thru my window)
All the answers (answers)
All the answers (answers)
All the answers (answers)

Now you're faster
But I don't like you
You're a problem
I must do it
It's so complex
But so simple, simple
You made me crippled
I'm addicted

Some people are afraid of you
But I'm not, I'm not
I'm a dummy and I just don't care
Only you know (thru my window)
All the answers (answers)
All the answers (answers)
All the answers (answers)

You were made to make the bad times go away
But as it looks, they're here to stay
Take me back before the automated life
Took us over, over

Some people are afraid of you
But I'm not, I'm not
I'm a dummy and I just don't care
Only you know (thru my window)
All the answers (answers)
All the answers (answers)
All the answers (answers)
All the answers, answers
All the answers (answers)
All the answers (answers)
